Buttock Augmentation

Buttock augmentation, also known as gluteal augmentation, is a surgical procedure that improves the contour, size, and/or shape of the buttocks. This is accomplished through the use of buttock implants, fat grafting, or a combination of the two.

Buttock implants are silicone-filled implants that are surgically implanted deep within the buttock tissues. Buttock augmentation with fat grafting entails transferring fat from one area of the body to the tissues of the buttocks. This technique is also known as a Brazilian butt lift.

What can buttock augmentation surgery do?

- Increase the fullness, roundness, and projection of your buttocks.
- Improve the asymmetry of your body figure
- Improve your self-esteem and confidence.

A buttock lift can be achieved through surgical removal of soft tissue in addition to buttock augmentation procedures.

The procedure is ideal for people who:

- You are in good physical shape.
- You have reasonable expectations.
- You have the uneasy feeling that your buttocks are too small.
- You dislike the roundness or general shape of your buttocks.
- Your butt is asymmetrical.

In general, you may be a good tummy tuck candidate if:

- Individuals with significant gluteal soft tissue looseness
- Individuals who are healthy and free of medical conditions that impede healing or increase the risk of surgery:
- Individuals who have a positive attitude and realistic expectations for what gluteal lift surgery can accomplish
- Nonsmokers
- Individuals who are committed to living a healthy lifestyle through proper nutrition and exercise.

BEFORE & AFTER

TESTIMONIALS

Amazing New Butt!

The surgeon and his team are fantastic! I had a wonderful experience with the surgeon and staff, as well as the nurses in the surgery suite. Everyone was so kind and nurturing, especially on the day of surgery when I was nervous. The surgeon was always friendly and professional; after his markings on the day of surgery, he took the time to help cover me with my blanket and ensure I was comfortable.

The results are fantastic - the ab etching is excellent, and my butt looks brand new! I cannot recommend it highly enough! If you want to change your appearance, surgeons at Lelux Hospital are a good option.
